## PROFESSIONAL SUMMARY

The difference between an average developer and a great developer is not how well they code, their knowledge, or their confidence. While those do have some merit, what differentiates mediocre from excellent, is the ability to collaborate with others. I value collaboration and believe it is essential for a team to excel and deliver.

I am a passionate developer that thrives in a fast-paced work environment. I enjoy working in teams and setting deadlines for myself and/or team in order to deliver quality, reusable code. I don't perform well in workplaces that are not constantly challenging me and pushing my limits. I consider myself a life-long learner and often spend my free time working on personal projects, or experimenting with ideas.

I have 2+ years of development experience. I first was introduced to coding when I took a summer coding bootcamp. I then attended Mountainland Technical College over the course of 9 months where I received a Web Development Certificate. Since then I have been working as a FullStack developer on a wide variety of projects and applications.

## TECH STACKS

- Vue/Vuex/Quasar/FeathersVueX
- Feathers.js/Node.js/Socket.io
- MongoDB/Mongoose
- Git

## SKILLS

- Team Collaboration
- Sprint planning
- High Aptitude
